

GOLDEN SKIN

Discover the secret of timeless beauty

The luxurious combination of caviar, gold and honey for rejuvenated skin with an enchanting radiance

Skin ageing is a natural process that is characterized, among other things, by the loss of elasticity and resilience of the skin. Over time, the production of collagen and elastin decreases, leading to wrinkles, fine lines and a sagging complexion. The luxurious and highly effective ingredients in our Golden Skin skincare range aim to slow down this process and preserve the skin's youthfulness.

Caviar extract is rich in proteins, amino acids and vitamins that help to improve the skin's natural elasticity and protect it from collagen breakdown. Gold particles work on a cellular level by stimulating skin cell regeneration and evening out skin tone to promote a radiant, youthful appearance. Honey is known for its moisturizing and antioxidant properties that intensely nourish the skin and protect against free radicals.

BENEFITS

- Stimulation of skin regeneration
- Improved skin texture
- Noticeably and visibly firmer and excellently hydrated skin texture
- Radiant, youthful appearance
